INTRODUCTION

The SB-5645LCM-CT is a high-performance 4x4 matrix routing switcher with (4) HDMI inputs and supports simultaneously (4) HDMI and (4) HDBaseT™ Outputs. The SB-5645LCM-CT is based on HDBaseT™ technology and supports full resolution HDMI video with embedded audio, RS-232, and IR bi-directional all over a single CAT5e/6/7 cable. With a signal bandwidth of 340Mhz, there is no signal degradation. High Definition Digital signals can be selected and distributed to any (8) outputs simultaneously (4 channels by 2). The switcher is certified as being fully CEC and HDCP 2.0 compliant, HDMI V1.4a 3D formats, data rates up to 6.75Gbps. Supports UXGA/WUXGA/DVI 1920x1200 resolutions to any HD displays. The SB-5645LCM-CT has (1) CAT5e/6/7 HDMI connector for each output, effectively making this an 4x8 switcher (same signal on both channel outputs). (1) RJ-45 connection on each output extends the HDMI signal to remote locations via HDBaseT™ Receiver SB-6335R. The EDID can be selected between (7) different modes. Control is provided via front panel push buttons, IR remote or via RS-232. A RS-232 Windows GUI interface is provided for matrix routing.
